Assemble and QA path with different user experience using company content management system per business team's specifications. Build digital marketing contents like lightboxes, inline messages and surveys on sites using HTML5, CSS and JavaScript within Salesforce content management tool Evergage. Create SmartExit logic for user to support business strategies and tests. Work with Data team and help them better collect the user experience data they need based on the content we created. Work closely with development team to identify and test new features and functionalities. Advise and learn new technology and tool for custom digital marketing plan. Manage deployment of each project and troubleshoot issues as they arise.
